## Photocell

Introducing our advanced Electronic Photo Controls with a swivel arm, designed for easy reorientation post-installation. These controls are compatible with standard ½" knockouts found in typical outlet boxes and wall pack lighting fixtures. Built to withstand outdoor conditions, our photo controls feature a UV stabilized, high-impact plastic housing and a silicon light sensor with zero-crossing circuits to ensure long-lasting performance.

### Key Features

- **Swivel Arm:** Facilitates easy adjustment and reorientation after installation.
- **Standard ½" Knockouts:** Fits seamlessly into standard outlet boxes and wall pack lighting fixtures.
- **Durable Housing:** UV stabilized, high-impact plastic housing designed to endure harsh outdoor environments.
- **Reliable Sensor:** Non-drifting silicon light sensor with zero-crossing circuit for extended service life.
- **High Capacity:** Controls outdoor, security, and floodlighting up to 1,650W at 277 VAC.
- **Surge Protection:** Equipped with a 255-joule MOV surge protector.
- **Wire Leads:** Comes with #18 AWG, 6" wire leads for easy connection.
- **Outdoor Usage:** Specifically engineered for reliable performance in outdoor settings.
