

# DMX Scene Kits

DMX Made Simple — No Guru Required

Complete, pre-engineered kits that bring DMX color control to any project — without the complexity. Two tiers: **Basic** for straightforward scenes, **Dynamic** for full timeline programming.

## WHY CHOOSE DMX SCENE KITS

- 1 Turnkey — Everything Included**  
Controller, touchscreen, and all accessories ship as a complete kit. No guessing what parts you need.
- 2 Wi-Fi Programming, No Software**  
Basic kit uses our DMX Configurator web tool over Wi-Fi — no laptop software to install, no license fees.
- 3 Native Cooper / WaveLinx Integration**  
Works natively with Cooper WaveLinx systems — no extra gateways or translators required.
- 4 Scalable From Simple to Sophisticated**  
Basic handles everyday scene control. Dynamic adds Pharos Expert for timelines, triggers, and full show control.

## KIT COMPARISON

Kit	Highlights
<b>BASIC</b>	7" touchscreen, up to 70 static scenes, Wi-Fi setup via DMX Configurator, Nuvospec-assembled
<b>DYNAMIC</b>	Pharos Expert controller, full timeline & trigger programming, multi-zone, show control capable

## FEATURE HIGHLIGHTS

- ▶ 7" color touchscreen for scene selection
- ▶ Up to 70 scene presets (Basic)
- ▶ Pharos Expert show controller (Dynamic)
- ▶ Timeline & trigger programming (Dynamic)
- ▶ Wi-Fi configuration — no software needed
- ▶ Pre-wired, UL-listed enclosure

## WHEN TO SPEC IT

- ◆ **Architectural Accent Lighting**  
Lobbies, atriums, and feature walls that need repeatable color scenes without a full AV system.
- ◆ **Houses of Worship & Event Spaces**  
Color-changing environments where non-technical staff need simple touchscreen control.
- ◆ **Healthcare Tunable White**  
Circadian or clinical color temperature schedules with automatic timeline triggering (Dynamic).
